ID: SECURITY-POL00029
Driver: Danny Lee
Classification: Internal
Version: 11.0

Information Security Policy

1. Overview

This Information Security Policy ("Policy") outlines the strategic objectives, requirements, and goals to secure data, systems, networks and products under Adobe's control ("Adobe DSNP"). This Policy is supported by Standards, referenced throughout, describing how compliance is achieved.

2. Scope

Except as otherwise noted, this Policy applies to all Adobe Workers of an Adobe Group Company.

.

3. Statement

3.1. Adobe's Security Policy

3.1.1 Adobe Workers must protect the confidentiality, integrity, and availability of Adobe DSNP, as may be required by applicable legal and regulatory requirements and security best practices, as detailed in Information Security Policies, Standards, Procedures, Training and otherwise reasonably communicated to Adobe Workers.

3.1.2 Adobe Workers will meet the expectations of due care and diligence required by its internal and external stakeholders, such as but not limited to, its customers, shareholders, partners, Adobe workers, and the business. Examples of due care and diligence are documented and evidenced at the Adobe Trust Center.

3.1.3 Vulnerability testing and patching processes will be performed by applicable Security and Product teams in accordance with requirements outlined in the Vulnerability Management Standard.

3.1.4 Adobe Workers will design and develop products using security by design principles, including without limitation integrating security checks into the product lifecycle. See Secure Product Lifecycle Standard for detailed requirements.

3.1.5 Adobe Workers must restrict access to Adobe DSNP based on role and sensitivity of the data, system, network or product, using appropriate authentication protocols. Access to Adobe DSNP must be restricted by Adobe Workers based on role and sensitivity of the data, system, network or product. Access to such DSNP must be protected using the appropriate authentication protocols. See Authentication, Logical Access Account, and Data Classification and Handling Standards for detailed requirements.

3.1.6 Adobe Workers must safeguard the control and computing environment by complying with requirements of password security, remote access and software downloading. See Authentication Standard, Remote Access Standard, and Software Management Standard for detailed requirements.

3.1.7 Adobe Workers must safeguard the resources and data within cloud operated environments in accordance with requirements outlined in the Uniform Cloud Security Standard.

3.1.8 Adobe Workers must protect Adobe's source code and source code management systems in accordance with requirements outlined in the Source Code Security Standard.

3.1.9 Adobe Workers must immediately notify the Adobe Cyber Security Center (ACDC) at ACDC@adobe.com of an Incident. See Information Security Incident Response Standard for detailed requirements.

3.1.10 Adobe Workers are responsible for ensuring that vendors that access, transmit, share, use, process, store, or otherwise handle Adobe Data or environments in any fashion are reviewed for compliance with Adobe's security policies and requirements. Refer to the Vendor Information Security Management Standard for detailed requirements.

3.1.11 Adobe Workers are required to:

- Handle different classifications of data in accordance with the Data Classification and Handling Standard.
- Complete a security awareness training every year or as more frequently instructed.
- Comply with Adobe's Technology Policies and Standards where applicable to their roles.

3.1.12 Adobe Workers who are responsible for designing, developing, implementing, or maintaining the technical aspects of Adobe products and services are required to complete relevant technical security training. Refer to the Security Training Standard for more detailed requirements.

3.1.13 The minimum-security requirements contained in Adobe's Technology Policies and Standards will be made available to Adobe Workers through Adobe's intranet site Inside Adobe. Refer to the Information Security Management Manual for more detailed requirements on the communication and availability of these Policies and Standards.

3.1.14 New acquisitions must become compliant with Adobe Technology Policies and Standards within the first year of the acquisition. If the acquisition is unable to comply at the one-year mark, exception(s) must be submitted and approved for the related governance document(s). See Exceptions section below.

3.2. Information Security Program Management

3.2.1 Adobe will maintain an Information Security Program that:

- Demonstrates management's commitment to and support of information security practices.
- Establishes and communicates information security Policies and Standards.
- Outlines and communicates security roles and responsibilities to relevant Adobe Workers.
- Aligns with contractual and regulatory security obligations.
- Delivers a consistent, documented risk management process.
- Maintains a sustainable, continuously improving security program that aligns with Adobe's security risks, priorities, and projects.
- Aligns with Adobe's Common Control Framework (CCF).

4. Violations

Minor issues complying with this Policy and Governed Standards are non-punitive and are part of Adobe's continual improvement. Minor non-compliance will be dealt with at the local team or service level.

Major violations that involve violation of laws, violation of written agreements, or willful disregard of the Policy may be subject to disciplinary action up to and including termination of employment or contract.

In addition, inadvertent failure to comply, and/or deliberate violation of this Policy and Governed Standards may expose Adobe to potential reputational damage, financial loss, risks to Adobe Workers and customers and regulatory inquiry.

5. Exceptions

Exceptions to compliance with this Policy and the Governed Standards thereunder are subject to approval by Adobe Security (and other applicable parties as Security determines) and are granted based on having both a legitimate business justification and having sufficient mitigating controls in place. Exceptions are only ever temporary and never permanent. See the Information Security Risk Exception and Acceptance Procedure for additional details. To request an exception for consideration, please go to the Technology Policies and Standards site and complete the exceptions request form.

6. Definitions

Term	Definitions
Adobe Group Company	Adobe's consolidated subsidiaries, to the extent those subsidiaries are operationally integrated.

Term	Definitions
Adobe Worker	Any regular employee, Adobe-paid temporary employee, or contingent workers (including agency temporary employees, independent contractors, and vendor employees), as well as interns of an Adobe group company.
Availability	Data and information systems are available when required.
Confidentiality	Ensures that data or an information system is accessed by only an authorized person.
Incident	An unauthorized occurrence (or a series of related unauthorized occurrences), that jeopardizes the confidentiality, integrity, or availability of Adobe data, systems or products ("DSNP") or the increased risk of such compromise, therefore requiring the assessment of potential security, privacy or confidentiality risk for Adobe, its customers, Adobe Workers or other individuals. An Incident may result in Adobe DSNP being lost, stolen, acquired or accessed by an unauthorized party (i.e., internal or external) or accessed or acquired by authorized parties who have no legitimate business need for such information, whether intentional or accidental. This includes Incidents with respects to Adobe DSNP held at home or at third parties.
Integrity	Assures that the data or information system can be trusted. Ensures that it is edited by only authorized persons and remains in its original state when at rest.

7. Responsibilities

Group	Responsibilities
Adobe Workers	Read, understand, and comply with the requirements of this Policy.
Management	Ensure their direct reports are aware of and adhere to Adobe security requirements.
Vendors	Depending on their relationship and configuration with Adobe and its networks, vendors are expected to protect Adobe's systems, products, and data.

8. Governed Standards

The below referenced Standards are governed by this Policy and must also be met to be compliant with this Policy. These can be found on the Technology Policies site:

- AIML Model Protection Standard
- Authentication Standard
- Cardholder Data Protection Standard
- Cryptography Standard
- Customer Authentication Standard
- Data Classification and Handling Standard
- Data Governance Standard
- FedRAMP Environment Protection Standard
- High Risk Jurisdiction Standard
- Information Security Incident Response Standard
- Key Management Standard
- Logical Access Account Standard
- Network Security Standard
- Remote Access Standard
- Secure Data Deletion Standard
- Secure Product Lifecycle Standard
- Security Training Standard
- Security Monitoring Standard
- Source Code Security Standard

- Security Risk Management Standard
- Uniform Cloud Security Standard
- Vendor Information Security Standard
- Vulnerability Management Standard

9. References

All Standards referenced above.
