Questionnaire Resource

by The Office of the General Counsel

Updated October 2025

WHO IS THIS GUIDE FOR?

This guide is intended for anyone who has been asked by a customer to complete a questionnaire or form.

WHAT WILL YOU FIND IN THIS GUIDE?

You will find the most common topics of questions, a contact name and/or DL, sample questions with answers, and links where additional information can be found.

WHEN SHOULD YOU USE THIS GUIDE?

When you receive a request to complete a questionnaire or form, you should use this resource as a guide to find the basic information to complete the request.

INTRODUCTION

As Adobe is closing new deals, renewing current deals, and interacting with customers, customers occasionally request questionnaires or forms to be completed so they can proceed with the deal.

This guide addresses the most common questions asked on these questionnaires by topic. Each topic has a:

CONTACT NAME/DL: The Contact Name/DL is who can be reached out to for additional questions or clarification.

QUESTIONS ABOUT: Provides a summary of what each topic addresses.

STANDARD RESPONSE: Some questions have standard responses that can be provided to customers. If the customer has any pushback, please reach out to the Contact Name or DL listed.

LINKS: Additional links where further information can be found. If a policy is not already published on an Adobe public facing site, please **do not** provide or share internal-facing documents with any external party.

SAMPLE QUESTIONS, ANSWERS, AND ADDITIONAL INFORMATION: This section has the questions commonly asked, the answers to those questions, and where additional information can be found.

NOTE: It is the Account Representatives'/Customer Success Managers'/Questionnaire Recipient's responsibility to complete their customers' requests using approved Adobe responses on Inside Adobe and in this questionnaire resource.

*If a signature is needed to complete the questionnaire, and **no confidential information is being shared**, the main contact of the questionnaire can sign the questionnaire.*

If there are any formal attestation/signature needed for a topic, contact the appropriate SME for that topic.

2.0 SALES SECURITY QUESTIONS

CONTACT NAME/DL: DL-Sales Security Questions

QUESTIONS ABOUT:
- Security Questions
- Security Certifications (SOC II Report, ISO-22301, ISO-27001, etc.) – available now self-service on https://www.adobe.com/trust/resources.html
- Information Security (InfoSec)

ADDITIONAL INFORMATION:
- Security, Privacy & Compliance Field Readiness
- Updated Compliance Reports Available on the Adobe Trust Center site on Adobe.com
- **NEW:** The hosting locations for Creative Cloud, Document Cloud and Experience Cloud are now available on the Trust Center. (Please note that the hosting location for each customer is determined during the implementation phase and is based on the customer's proximity and choice; the security team does not have any visibility into this.)

NEW: Before contacting our DL, we encourage you to use "Sherlock", our self-service Slack AI Bot. Sherlock pulls from the Adobe Trust Center documentation and our internal security knowledge base to generate quick responses to security questions. You can utilize Sherlock to answer your customer's security questions. Tag @Sherlock in the slack channel #Sales-Security-Questions to get immediate answers to security questions today!

Sherlock AI Assistant is now available for Teams as well! Just a couple of things to remember:

- Use the correct channel – Sherlock only works in the recommended channel. It is highly suggested that you add it to your "Favorites" for easier access.
- Tag the right Sherlock – When tagging Sherlock, make sure to tag SherlockAI (the one with the Sherlock logo). There are other apps with similar names, so be careful to choose the correct one.
- Add new members easily: If you want to add someone to the channel:
    - Go to the channel:
    - Click the arrow on the right side
    - Under "People", click the icon to add new members, organizations, etc.

The link for the channel is: Sherlock AI Questions | Sherlock AI Bot for-Security | Microsoft Teams

NEW: Request access to Security-vetted responses

Skypher is a questionnaire automation tool and is our team's own go-to resource for responses to Security questions. Leverage automation and the confidence of these vetted responses to get the answers you're looking for.

You can now request a license here: Skypher License Request

If you need technical support with Skypher, reach out to Skypher directly via Slack: #skypher-support

SAMPLE QUESTIONS, ANSWERS, AND ADDITIONAL INFORMATION:

2.1 How do I get assistance with a security questionnaire from the customer

As a first push, please share our Trust Center available for download here: https://www.adobe.com/trust/resources.html.

If, after downloading and reviewing these documents, the customer insists on a custom questionnaire, follow the process described below:

a. Before creating a ticket in our queue, please make sure that your deal meets our engagement thresholds.

To create an official security engagement ticket/request, an NDA must be in place between Adobe and the customer. Visit the NDA Self-Service Portal if you need to create one.

b. Log into JIRA to create a support ticket
c. Select Project - Security Information Request (DMSR)
    i. Select Issue Type from Questionnaire, Call, PenTest Results (for information around

current pen test documents and findings), Penetration Test (for customer-initiated pen tests), Audit (for audit tickets, whether on-site or remote, based on audit rights in the agreement) and Agreement (for security exhibits/legal agreement reviews from our side)

Note: Do not select Security+ issue type as that causes massive delays in processing of your request.

ii. Fill out the request form, provide login details for online portals, if applicable, or attach any attachments like questionnaires and click Submit.

To set the right expectations from the beginning, kindly inform the customer about our 10 business days SLA turnaround for security requests.

2.2 Where are the security white-papers located? What are pitch templates? What do they contain and where can I find them?

The Adobe Trust Center enables our customers to find and download security and compliance information for Adobe products and services more easily.

In addition to security overview white papers for all our corporate security programs and individual products, you will now find:

- Security Testing Reports BCDR fact sheets
- Compliance certifications (For example: SOC2 and HIPAA) and related Bridge letters
- Prefilled standard questionnaires, including CSA, CAIQ and SIG AI documentation

While our security overviews remain publicly available, these additional documents contain sensitive, proprietary information and do require a completed non-disclosure agreement (NDA) to access. This agreement is specific to the Adobe Trust Center and is in addition to any previous NDA you may have with Adobe.

The pitch templates can be used to send a security package directly from the **Field Readiness** website including a direct e-mail option, link pitch or live pitch.

Just use which Pitch template you need, depending on the product in scope and use this feature to send an already pre-completed, editable e-mail, that always has the security & compliance documentation attached, like a security package. This will speed up the process, eliminating the need to download a security package off-line and then sending it separately to the customer.

Having an NDA in place also applies to the Pitch templates functionality!

The product specific Pitch templates can be found here.

2.3 Where can I find the latest third-party penetration testing report/remediation report?

The latest available reports can be found on the Adobe Trust Center for each of the product in scope under Security Testing Reports category.

2.4 My customer wants to perform a penetration test on the solution. What do I do?

Not all the solutions allow customer driven penetration tests. To understand more around this process, kindly follow the process described in this internal link.

2.5 How long are ISO 27001, ISO 22301 and SOC 2 certificates valid?

Adobe has an annual re-certification cadence for their SOC 2 reports (using a 12 month operating effectiveness period, where applicable). The SOC 2 auditor can only certify for a period that's already happened. For example, as part of 2025 annual audit cycle, we expect the next report to be issued in Dec' 2025 and will include operating effectiveness period from Nov 1st, 2024, to October 31st, 2025.

The SOC 2 reports found on the Trust Center are the most up to date SOC 2 reports available. SOC 2 reports provide a confirmation of security practices in place, that were followed in the previous 12 months.

Typically, customers accept the report for 1 year, following the end of the audit period. ISO 27001 certificates are valid for 3 years, but we re-certify annually. ISO 22301 certificate is also valid for 3 years.

2.6 How can I request a training with the security engagement team?

Want to increase your confidence in pitching Adobe Security to your customers? Enhance your team's security knowledge with personalized training resources available from our security field enablement team. Complete the training request form on the new Field Readiness page to help us understand your training needs better.

2.7 How can I submit a security feature request?

Our new Customer Feature Hub is designed to gather your customers' feedback, concerns, and new feature requests, ensuring we move alongside industry trends to help us strengthen our security posture. Such insights are critical to driving Adobe's security innovation and maintaining our competitive edge in the market. Check the new Field Readiness page to access the submission form.

3.0 ARTIFICAL INTELLIGENCE (AI) QUESTIONNAIRES

QUESTIONS ABOUT:

- AI in Adobe's Products and Services; Adobe's approach to AI development and implementation; AI compliance.

Additional Information:

- General Adobe AI documents on Adobe.com:
  - Adobe AI Ethics Overview: A summary of Adobe's ethical approach to artificial intelligence on Adobe.com

- Adobe Trust Center: Adobe.com resource library to access our most up-to-date information, including details about our security and compliance controls, current industry and regulatory compliance attestations

How do I get assistance with a customer AI questionnaire?

a. Try the Sherlock self-service AI bot!

> **NEW:** Before contacting Sales Security Enablement, we encourage you to use "Sherlock", our self-service Slack AI Bot. Sherlock pulls from the Adobe Trust Center documentation and our internal security knowledge base to generate quick responses to security & AI questions.
>
> You can utilize Sherlock to answer your customer's security and AI questions. Tag @Sherlock in the slack channel #Sales-Security-Questions to get immediate answers to security questions today!

b. Please submit the questionnaire to the Sales Security Enablement team to centrally manage the process in the first instance. Depending on the nature of the specific questions, the Sales Security Enablement team will then determine if it can be completed by their team, or if the questionnaire should be assigned to other internal teams (such as Product Management or Legal) for additional input.

   Before creating a ticket in queue, please make sure that your deal meets the engagement thresholds.

   To create an official security engagement ticket/request, an NDA must be in place between Adobe and the customer. Visit the NDA Self-Service Portal if you need to create one.

c. Go to the Security, Privacy, Trust & Compliance | Field Readiness page

   - **Click the *"Got an AI Questionnaire? We Can Help!"* link to submit a JIRA support ticket.**

b. Fill out the request form, provide login details for online portals, if applicable, or attach any attachments like questionnaires and click ***Submit***.

   Kindly manage expectations with the customer from the outset that there is a standard 10 business days SLA turnaround for typical requests. However, for detailed AI questionnaires involving cross-team collaboration, additional time may be required.

4.0 ETHICS & COMPLIANCE

Contact: DL-Integrity

1. *The examples provided in this section may not be applicable to every situation. Requestors are encouraged to use their best judgment when determining the relevance and applicability of these examples.*

2. *Please avoid answering any questions in Yes/No terms. If binary Yes/No terms are required for submission, please provide additional context using the responses below.*

3. *Due to the confidential nature of Adobe policies, only the policies posted on Integrity @ Adobe are available for external access. If a policy is not already published on a public-facing Adobe site, please do not provide or share internal-facing documents with any external party.*

13.6 How does your company monitor your suppliers and subcontractors to ensure they are complying with our Code of Conduct?

- Adobe conducts vendor due diligence ensure vendors are committed to integrity and compliance with laws. The due diligence process is incorporated into the vendor onboarding process, which consists of periodic vendor recertification and rescreening. All vendors are asked to attest to Adobe's Business Partner Code of Conduct and any exceptions are reviewed by Adobe's Ethics & Compliance Office.

13.7 Do you have a policy, supplier code of conduct or similar standard that covers human rights, environment and safety that you issue to your own suppliers/third parties/subcontractors?

- Please refer to Integrity @ Adobe

13.8 Does the company require its suppliers to comply with relevant laws/standards with respect to labor standards and OH&S? If yes, how is this requirement communicated and assured?

- Please refer to Integrity @ Adobe

14.0 889 CERTIFICATIONS

CONTACT NAME/DL: Phil Raptis

When a government purchaser uses a credit card, they are required by the Federal Acquisition Regulation ("FAR") to get a Section 889 certification, which typically involves a standard government form. However, the government recognizes that completing and executing these forms i/c/w every sale, regardless of size, can be unduly burdensome for a company like Adobe. As such, the FAR provides that completing a representation form is not required where the merchant has posted its Section 889 representation publicly, which Adobe has done.

Accordingly, Adobe no longer provides custom representation forms to customers or commercial entities (such as prime contractors to which Adobe is a supplier) on demand. Instead, we will provide the requestor either this standard response or the standard response below:

STANDARD RESPONE:

Adobe no longer provides representation forms since the FAR does not require them where the merchant has an active System for Award Management (SAM) Registration with an updated FAR 52.204-26 (Oct 2020) representation. You can verify Adobe Inc.'s SAM Registration at www.sam.gov. Adobe Inc.'s Unique Entity ID is SGQ3ZSBJ4P77, our DUNS is 102096559 and our CAGE Code is 0G7E0.
