Classification: Internal

Version 11.0

Employee-Assigned Asset Standard

1. Overview

This Standard outlines the responsibilities of Adobe employees for the maintenance and security of Adobe-owned hardware to Adobe workers.

This Standard also requires that:

1. Adobe devices in use must be enrolled in the Device Management Service with current Endpoint Detection and Response (EDR) installed.
2. When an employee has finished using Adobe hardware, or when the employee leaves Adobe, the asset must be returned to Tech Café Services.

2. Scope

This Standard is in reference to laptop, desktop, or mobile (smartphone or tablet) hardware issued to Adobe Workers; hereafter referred to as 'Adobe assets'. Additionally, this Standard applies to Adobe Workers who are provided with Adobe assets, hereafter referred to as 'Asset Custodian'. Adobe assets are defined as assets owned by Adobe.

This Standard is applicable to Adobe Workers working at an Adobe office or a remote location.

Asset Custodian: Adobe Workers who hold Adobe assets.

Cost Center Manager: Authorized Business Unit (BU) leader having control of spends on their cost centers, approve/deny hardware purchases.

Device Lifecycle Management Team: Governs lifecycle of Adobe Assets, from acquisition to disposal, to ensure efficient use, compliance, and maximized value.

Tech Café Services: Employee support team that deploys, facilitates repairs, collects, assigns and un-assigns Adobe assets to Adobe Workers.

This Standard does not apply to Bring Your Own Device (BYOD) devices. Please see the BYOD Standard for requirements on BYOD.

Refer to the Mobile Device Usage Standard for service offerings, eligibility or usage requirements on Mobile devices.

3. Statement

3.1. Asset Custodian

3.1.1 An Asset Custodian who is issued an Adobe asset is responsible for adhering to the requirements of this Standard.

3.1.2 Asset Custodians are responsible for:

- Care, custody, and control of an Adobe asset issued to them.
- Ensuring their Adobe asset complies with baseline security requirements (enrolled in the Device Management Service with the current EDR software installed) – see Laptop/Desktop Configuration Standard (macOS & Windows). For iOS and Android configurations see the Mobile Device Usage Standard.

- Preventing unknown or unauthorized individuals from using or accessing their Adobe asset.
- Preventing other persons from accessing their network Asset Custodian account or password.
- Returning their existing Adobe asset to Tech Café Services upon receipt of replacement equipment or upon termination of their employment at Adobe.
- Protecting their Personal Information (PI) (see Data Classification and Handling Standard for definition), and ensuring PI data is removed from all computers before returning them to Tech Café Services.
- Maintaining an accurate record of devices provided to them, by periodically validating and reporting any changes or errors to the Device Lifecycle Management team for correction.

3.1.3 Custodianship of Adobe assets are granted by Adobe provisionally, with rights to use the asset during the term of their employment with Adobe, subject to terms and conditions stated in this Standard and other Adobe Policies and Standards, as applicable.

3.1.4 Allocation: Asset Custodians are eligible for the following number of single user assets (devices being used as single user end point):

- Cost center managers and direct managers are responsible for regular employees and interns in Engineering roles (see definition below) to be custodians of no more than two computers (new or used).
- Cost center managers are responsible for regular employees and interns in non-Engineering roles to be custodians of no more than one computer (new or used).

3.1.5 Adobe assets are provided to Asset Custodians for use both on and off company grounds for company-related business. When using Adobe assets, including access to Internet, e-mail and Adobe Corporate Applications, Asset Custodians must comply with this Standard and the Electronic Communications Policy, which covers privacy and appropriate use of Adobe's electronic equipment and technology systems.

3.1.6 Asset Custodians and their Business Units will be held financially responsible for restoring any damaged Adobe assets to a working condition.

3.1.7 Lost and Stolen Adobe Assets:

3.1.7.1 Asset Custodians are responsible for reporting lost or stolen Adobe assets immediately to Global Safety and Security – 1-800-866-8006 (ext. 4-4444). If *stolen* on *non-Adobe* property, it must also be reported to the police.

3.1.7.2 In case of a lost or stolen Adobe asset, the Asset Custodian must protect access to Adobe resources by resetting their corporate password immediately after reporting the asset lost or stolen. See Authentication Standard for details.

3.1.8 Asset Custodians must lock their workstation screen when leaving the workstation unattended.

3.1.9 Asset Custodians whose daily job requires collecting, viewing, transmitting or storing Restricted data (as defined in the Data Classification and Handling Standard) are responsible for protecting the data on their Adobe asset by putting in place the following minimum protection measures, which are also recommended when viewing or storing Confidential data:

- Encryption of the Adobe asset. A local Tech Café or Service Desk (toll-free number - 1800-208-9444) can assist in installing encryption software or verifying if encryption software is installed.
- Logging out of applications, servers, and database systems prior to leaving their workstation unattended. Locking a laptop or desktop screen alone is not sufficient.
- Privacy screen filters.
- Display positioned in such a manner as to prohibit unauthorized viewing.
- Theft deterrent (for example, locking in a desk drawer or office).

3.1.10 Upon the termination of an Adobe employee, managers of exiting employees, as well as exiting employees themselves, are responsible for ensuring that the employees' computer(s) and mobile device(s) are returned to Adobe Tech Café Services. Per the Mobile Device Usage Standard, Employees can request of their manager to keep their company-issued Mobile Device, so long as the employees assume financial responsibility for said mobile device before 5pm local time on their last day of work. If there is no such request and approval from the manager, it is expected that the company-issued Mobile Device will be returned to Tech Café Services upon termination. In EMEA this could be considered a taxable benefit.

3.1.11 For Asset Custodians under Garden Leave (see definition below), there may be exceptions during the exiting employee's Garden Leave that apply to the requirements in this section. Adobe assets must be returned to Adobe Tech Café Services before or on the final day of Garden Leave. For questions, please reach out to the Employee Resource Center (ERC).

3.1.12 When turning over an Adobe asset for proper disposal, an Asset Custodian must not remove the hard drive from the Adobe asset (laptop, desktop). The Adobe asset must be turned over to Adobe Tech Café Services intact.

3.1.13 As per U.S. government regulations, Asset Custodians are now globally prohibited to use any device (whether Adobe-owned or BYOD) for performing any service or furnishing any product in support of U.S. federal contracts if the device has the TikTok or any other application developed by ByteDance Limited on it.

3.2. Tech Café Services

3.2.1 Tech Café Services must assist Asset Custodians in ensuring compliance with baseline security requirements (enrolment of the asset in the Device Management Service with current EDR software installed).

3.2.2 Tech Café Services must reassign an asset to another Asset Custodian only after documenting the reassignment.

3.2.3 Assets returned to Tech Café Services must be wiped clean. Refer to eWaste Disposal Standard for requirements.

3.3. Device Lifecycle Management Team

3.3.1 Upon Termination of Employment of an Adobe Worker, the Device Lifecycle Management Team must ensure the following:

3.3.1.1 The manager of the exiting Adobe Worker and the Adobe Worker must be notified to return the Adobe-owned computers to Adobe Tech Café Services.

3.3.1.2 Managed devices assigned to exiting Workers not on Sensitive/Legal hold must be sent an automated remote wipe command after Last Day Worked (LDW). Managed devices assigned to exiting Workers on Sensitive/Legal hold must be sent an automated remote lock command after Last Day Worked.

3.3.1.3 If the Adobe asset is not returned to Adobe Tech Café Services, it must be reported lost/stolen and an investigation or disciplinary process is to be initiated by Adobe.

3.3.1.4 While Adobe Tech Café Services will make efforts to remove data from Adobe assets when disposing or issued for reuse, employees should have no expectation of privacy if they fail to remove personal information (PI) before returning the Adobe asset to Adobe Tech Café Services.

3.3.2 With respect to appropriate disposal of Employee-Assigned Assets, the Device Lifecycle Management Team must ensure the following:

3.3.2.1 Disposal of Adobe assets must meet the disposal process dictated in the eWaste Disposal Standard.

3.3.2.2 Adobe is committed to giving back to the community and may donate previously used Adobe assets to selected charities. Asset donation programs are managed by the Sustainability & Social Impact team under the direction of the Device Lifecycle Management team. For this reason, as well as regulatory requirements resulting in potential fines, Adobe assets must be returned to Adobe Tech Café Services and not disposed of improperly (for example, thrown in a trash can or recycled via an unapproved vendor). The Device Lifecycle Management team must determine what equipment meets donation criteria.

3.4. Shared Responsibilities

3.4.1 **Workstation Protection:** The responsibility for the following workstation protection controls are shared by the Device Management and Identity & Access Management Teams:

3.4.1.1 Adobe assets assigned to employees must be protected by the use of access credentials conforming to requirements dictated in the Authentication and Logical Access Account Standards.

3.4.1.2 To protect against instances when the employee does not lock their workstation, the workstation must be configured with an automated session timeout and display the screensaver, which must require re-authentication.

3.4.1.3 Not using email, public instant messaging, social media platforms, or other such communication applications while handling Restricted data.

3.4.2 An asset must be reassigned to another Asset Custodian only after Tech Café Services or Device Lifecycle Management Team have been notified and documented the reassignment.

3.4.3 Eligible Adobe computers are recommended to be replaced by the Asset Custodian (or the Business Unit) with a new computer after 4 years of use (end of life). Refresh orders for replacement devices cannot be placed more than three months before the computer being replaced reaches the end of life after four years of use unless the device is non-functional and cannot be repaired for a reasonable price. The standard recommendation of Tech Café Services is a four-year refresh cycle.

3.5. Software

3.5.1 Software installed on Adobe assets must comply with the Software Management Standard.

3.5.2 Software found on Adobe's Prohibited Software list must not be installed on an Adobe asset.

4. Definitions

Term	Definitions
Adobe Asset	Physical/virtual device and/or software that is purchased, or acquired via merger or acquisition, by Adobe and issued to an Adobe employee to use during the term of their employment.
Asset Custodian	Adobe Workers who hold Adobe assets and are responsible for the care and appropriate use of an asset (laptop, desktop).

Term	Definitions
Engineering role	Employees with Engineering-designated job codes within Workday.
Garden Leave	The practice whereby an employee leaving a job – having resigned or otherwise had their employment terminated – is instructed to stay away from work during the notice period, while remaining on the payroll. This is a common practice throughout the EU, New Zealand, and Australia. In the context of this document, an employee on garden leave might be permitted by law to retain their laptop until their garden leave is over. Please contact the employee resource center (ERC) for details.
PI	Personal Information (see Data Classification and Handling Standard).
Sensitive/Legal hold	A sensitive or legal hold, also known as a litigation hold, is the process by which organizations preserve potentially relevant information when litigation is pending or reasonably anticipated.
Managed device	Device enrolled in Adobe's Unified Endpoint Management Solution to access corporate resources. Device can be corporate, vendor or employee-owned.

5. Responsibilities

Group	Responsibilities
Adobe Personnel	• Read, understand, and follow the requirements of this Standard.
Adobe Technology Services	• Receive Adobe assets from terminated employees or managers of terminated employees. • Provide support for Adobe asset configurations (security or otherwise).
Device Lifecycle Management	• Update the standards and procedures in this Standard as necessary. • Assist and guide Adobe Workers in complying with this Standard. • Determine control measures and provide written guidance documenting such measures.
Facilities (Global Site Operations)	• Include Device Lifecycle Management Team in Change Management Planning related to real estate moves, changes, site closures or any operational changes or communications which could impact Adobe-owned devices • Hand Adobe hardware received by Facilities team without a known assigned Adobe worker, or found in unsecured areas, to Tech Café or Depot Team.
Human Resources	• Coordinate with Adobe Technology Services by prompting employees to use their assets appropriately and return them upon termination.
Manager	• Communicate the requirements of this document as necessary. • Monitor compliance and ensure that direct reports follow the standards and procedures in this Standard. • Ultimately responsible for returning the exiting workers' Adobe asset(s).

6. Governing Policy

Adherence to the governing Policy referenced below is required to be compliant with this Standard:

- Information Systems Asset Management Policy
